Artists in the House! was a 7-month program of site-specific installations by 14 artists interpreting the history and current presentation of Elizabeth Bay House. The house was the residence of Colonial Secretary and renowned naturalist and collector, Alexander Macleay in the 1830s.

The exhibition series followed on from my own work *A Humble Life* staged at the house in 1995.

The Artists in the House! series included critical and personal responses from some of Australia's foremost installation artists.
